About Radshid

Since its inception in 2007, Ideh Pardazan Parsi Farda Company, trading as Radshid, has been recognized as a knowledge-based enterprise. Radshid has consistently adhered to a fundamental philosophy centered around identifying and addressing infrastructure needs in the transportation sector through the provision of tailored, knowledge-based solutions. With a rich operational history spanning over 16 years, Radshid has effectively translated its philosophy into action, making substantial contributions to various industries within the country by delivering highly effective solutions.

Over more than a decade, Radshid has emerged as a prominent leader in the industry. Supported by a proficient team of experts and harnessing the technical knowledge of Radshid, the company has successfully obtained the required certifications and licenses.

With a remarkable production capacity of 300,000 devices, we take great pride in being one of Iran's largest and most dynamic manufacturers, specializing in a wide range of car trackers and fleet management systems.

Knowledge based company

Customizable Hardware and Software Production:
Empowering Personalization and Adaptability

Knowledge enterprise Radshid company, renowned for its highly skilled electronic and software engineers, takes great pride in its role as the premier designer and manufacturer of cutting-edge car trackers in Iran. In addition to customizing physical hardware to cater to specific customer requirements, the company also specializes in the development and production of a comprehensive fleet management system.

Fleet management

Providing fleet management solutions

Through its expertise in both hardware and software solutions, Radshid has made significant strides in addressing the diverse needs of various organizations, enabling them to achieve comprehensive management and monitoring of their transportation fleets.

The implementation of Radshid's fleet management system has yielded numerous benefits for its esteemed clientele and partners, including substantial cost reductions, stringent control and monitoring capabilities, and enhanced optimization of fleet and driver performance.

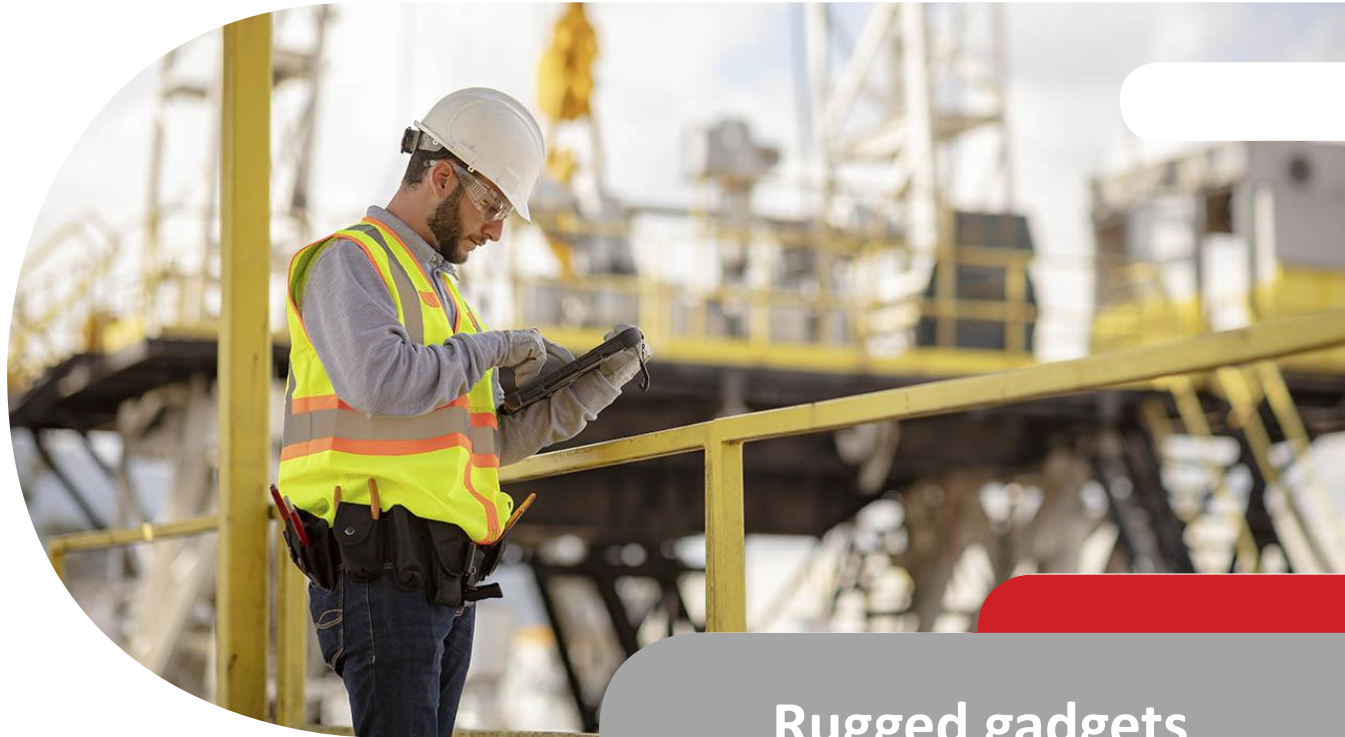

Fleet management

Providing Rugged gadgets

To cater to the demands of Iranian industries, Radshid Company has undertaken the role of identifying and fulfilling their specific requirements as an intermediary. This entails supplying a wide array of industrial tools, such as industrial tablets, laptops, and handheld devices, which can be tailored and customized to meet the precise technical specifications of each customer.

Remarkably, Radshid stands out as the sole Iranian company that offers a comprehensive warranty and guarantee for the supplied components of these products, ensuring utmost customer satisfaction and peace of mind.

Rugged gadgets

Radshid Log sheet Software

Enhancing data collection processes and augmenting operational efficiency across diverse industries.

Radshid Company offers a customer-centric integrated management and log sheet registration system that can be tailored to meet specific needs. This system empowers managers and officials in large industries to effortlessly gather comprehensive and accurate information, enabling effective planning and decision-making across operational processes and industries.

The “Log sheet” system boasts real-time data recording capabilities and wireless transmission to a central server, minimizing errors associated with manual data entry by human resources. Additionally, it facilitates real-time reporting, enhancing efficiency and providing timely insights for informed decision-making.
